

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

country. In case the dues are thus sent to Washington for transmission to Geneva, a check for \$20 for donating members, \$4 for nominal members, and \$2.50 for associate members should be sent, to cover dues, exchange and postage. To those preferring to send directly, Dr. Wiley will send the blank furnished by the congress, on application. It is particularly desired that as many as are able submit definitions for food and drug products, as it is profitable to accumulate as much material as possible, to establish a broad basis for decisions.

Papers on food and drug products are also solicited, and may be sent directly to the appropriate sections or forwarded to Dr. Wiley for transmittal. It is hoped that a large membership in the congress may be secured from the United States.

RECENT REFERENCES TO LAMARCK

THE increased interest in the work of Lamarck is nowhere better evinced than in the number of Lamarckian items which one finds in current journals. In the *Revue Scientifique* (December, 1907) there appears an article on his early career, in *La Nature* (December 21, 1907) a careful study of his paternal family, in the *Journal des Savants* on some of his unpublished writings. And Dr. C. R. Eastman, of Harvard, has now brought to light a manuscript of Lamarck which has in part at least remained unpublished. This document was obtained (probably purchased in Paris) by Professor Alexander Agassiz and was by him presented (1896) to the Museum of Comparative Zoology. It consists of a series of essays, two psychological ("Système de Gall," 40 pp., "Idée et Imagination," 33 pp.), one purely philosophical ("Apperçu analytique des connaissances humaines, avec des divisions et des réflexions tendant à montrer leur degré de certitude, leur source, leur branches principales," 12 pp.) and three zoological ("Questions zoologiques dont la solution est de première importance," 4 pp., "Discussion sur les caractères essentiels des animaux et sur la définition qui pent les embrasser généralement," 12 pp., "Histoire naturelle" (scope of), 4 pp.). Following these are numerous

drawings, doubtless from the hand of Lamarck, some in crude outline, as his "monads," some in color, of which one is a beautifully executed figure of a holothurian. At the instance of Dr. Eastman the manuscript has recently been placed in the hands of Professor Bashford Dean, of Columbia University, for detailed examination and publication.

SCIENTIFIC NOTES AND NEWS

PRESIDENT ELIOT, of Harvard University, will deliver six lectures at Northwestern University on the Norman W. Harris Foundation. His general subject will be University Administration, and the dates and titles of the separate lectures as follows: Lecture I., "The Trustees." Thursday evening, April 9, at 8 o'clock. Lecture II., "An Inspecting and Concurring body—Alumni Influence." Friday evening, April 10, at 8 o'clock. Lecture III., "The University Faculty." Saturday morning, April 11, at 10 o'clock.
